The background of the entire image is a close-up, high-resolution photograph of a wood surface. It shows a complex pattern of concentric and wavy growth rings in various shades of brown, from light tan to deep, almost black, tones. The texture is organic and detailed, with visible grain lines and some minor imperfections or knots.

SeraVista Porcelain Step

Another first from Seranit Porcelain: SeraVista

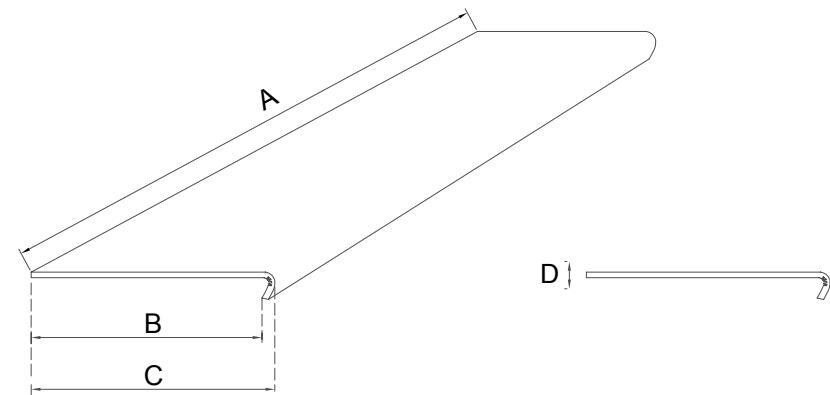

SeraVista steps are produced by reshaping the porcelain tiles in the Seranit Porcelain portfolio as step profiles. SeraVista enables to create a material integrity between spaces by providing usage of floor and wall tiles on steps too. SeraVista steps are durable and easy to apply, and have a wide range of usage, from high-traffic outdoor areas to indoor spaces. Steps are produced in 32 cm width and 120 cm length and are easily installed by cutting according to the dimensions of the step. Along with the steps, risers and skirting can also be cut according to size requirements, enabling steps to be completed quickly with perfect detail. All the technical features of the innovative and high tech SeraVista steps are exactly the same as Seranit porcelain tiles.

Porcelain steps have technical features, such as stain resistance, strength, low water absorption, durability and longevity. You can use all the porcelain tiles found in the Seranit catalog for SeraVista applications, thusly providing a continuity in vertical circulation in porcelain floored spaces.

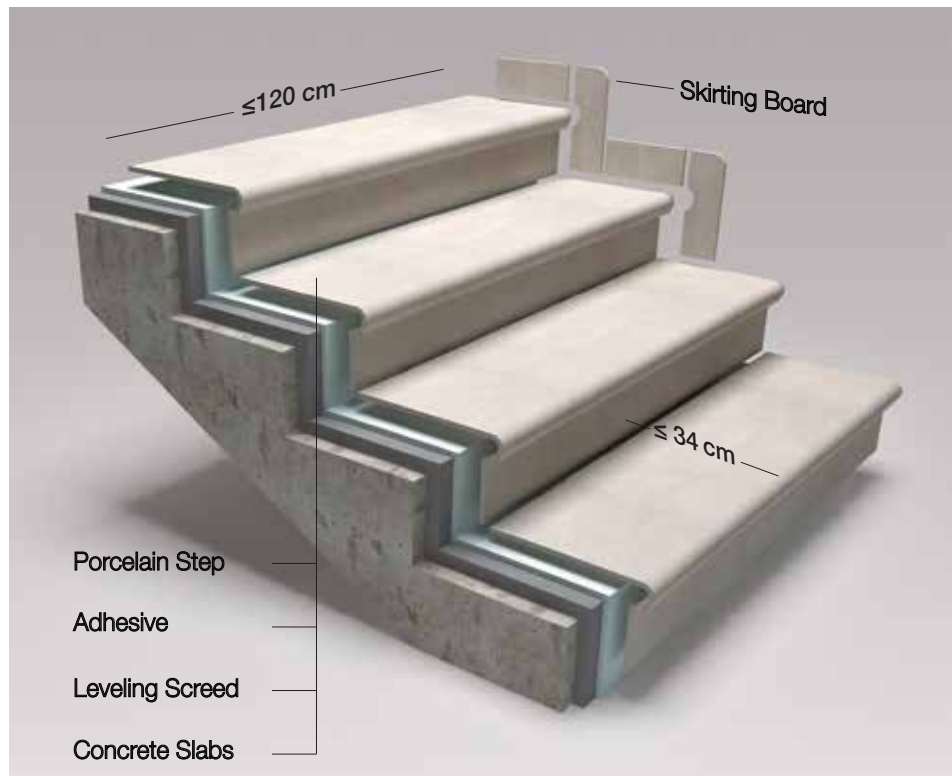

SeraVista Step

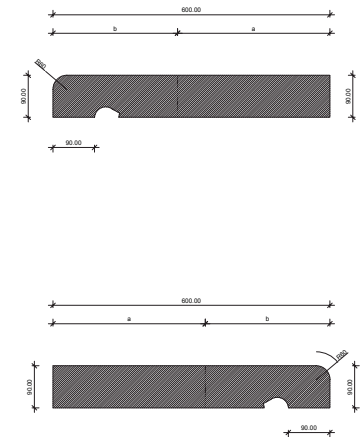

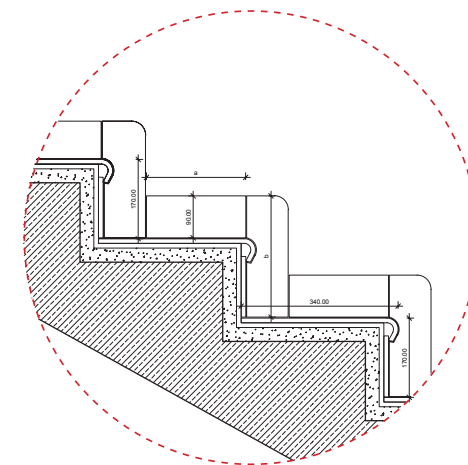

A	NET LENGHT	
	1200 mm* / 1208 mm*	48"
B	WIDTH	
	325 mm	12,80"
C	WIDTH	
	345 mm	13,40"
D	FRONT EDGE	
	50 mm	1,96"
THICKNESS		DEGREE
9.0 mm	0,35"	65"

Apart from above listed standard size step, on request special size steps are also cut from the standart steps.

Step height, riser and step size must be given in advance. In the given sizes of the drawings; the step height is 17 cm and stair width is 34 cm.

Aquanit Porcelain Shower Tile

Porcelain Tile

Aquanit has been designed to be easily applied. With its single-piece body, outlet and siphon elements are conveniently installed.

Easy Application

Aquanit has been designed to be easily applied. With its single-piece body, outlet and siphon elements are conveniently installed.

Anti-Slip

As it is produced with a special non-slip surface, it is safely possible for all members of the family to take a shower in the bathroom without slipping. Thus, the unhygienic anti-slip materials are not needed for the application anymore.

Hygienic

It provides complete hygiene in the shower area, where it is very critical, with its drain design that has minimized the areas where dirt can accumulate compared to old-style shower channels and its one-piece structure that does not require any jointing.

Drain System

As its floor is inclined towards the drain, there is no accumulation of water in the shower area, and the water does not overflow. Thanks to its unique integrated drain system, it can be used safely in your bathroom with its water-proof structure.

Stain-proof

Due to the feature of the porcelain tile, its water absorption value is close to zero and it is dirt and stain proof. Thanks to its resistance to chemicals, it makes cleaning the bathroom much easier.

Same-level

It is very important that the shower area is smoothly separated from the rest of the bathroom area with a floor that has a anti-slip (wet/dry) coating. Aquanit, with its same-level design that has no threshold or level difference enables both the elderly and the disabled to enter the shower area much more easily with the help of a supporting material (with walkers or wheelchairs).

Turkey's first and only porcelain shower tile, Aquanit, creates a design integrity in your bathrooms thanks to its various patterns such as marble, concrete and wood.
